## EXPERIENCE

### Shadetree Design Studio - 2012 - Current

Owner & Design Lead - I work closely with small businesses to help create the image they are trying to portray to their clients by designing and developing their logo, visual identity and web presence. Outside of business to business relationships, I love making cool stuff. I have a small line of hand-lettered t-shirts and frequently take on miscellaneous fundraising and charity projects.

### Untether - Late 2012 - Current

I am the Design contractor with Untether. I assist in visual design, user experience and front-end development (CSS/HTML). I also create prototypes and working frameworks. I helped brand the business itself during launch, including the logo, advertising materials, as well as website design and development.

### Driven - December 2016 - February 2017

I was also the Design contractor with Driven. We worked closely together to create their brand, logo, marketing material package, and website design and development.

---

## EDUCATION

- Attended Savannah College of Art and Design and earned 35 credit hours in the Graphic Design Program to add to the 35 hours earned in Computer Science and general studies.
- Received an academic scholarship and maintained a 4.0 GPA.
